Introduction to Portfolio Construction and Analysis with Python

Advanced Portfolio Construction and Analysis with Python

Python and Machine Learning for Asset Management

Python and Machine–Learning for Asset Management with Alternative Data Sets

23.09.2020

## **ANAND MOHAN**

has successfully completed the online, non-credit Specialization

## Investment Management with Python and Machine Learning

The Data Science and Machine Learning for Asset Management Specialization has been designed to deliver a broad and comprehensive introduction to modern methods in Investment Management, with a particular emphasis on the use of data science and machine learning techniques to improve investment decisions. By the end of this specialization, the student will have acquired the tools required for making sound investment decisions, with an emphasis not only on the foundational theory and underlying concepts, but also on practical applications and implementation with an emphasis on the hands-on implementation of those ideas in the Python programming language through a series of dedicated lab sessions.
